Subject to availability, Terms and conditions apply.

Content Distribution

Centralised Content Management System.

Dynamic digital signage is the management of information using full-motion video for various commercial environments. With digital signage, retail stores can change images easily and less expensively compared to using traditional signage. It also gives retail a regional, local and even site-specific content efficiently and inexpensively.

The ever increasing demand for dynamic digital signage has been a key factor in screen technologies, especially for POS and high brightness window displays.

- Available with interactive touch
- Bespoke content design / production
- Remote content / live assistance "
- Stereo loud-speakers
- Internal cooling system
- Maintenance access

Virtual Changing & Fitting Room

Magic Mirror, virtual changing room is seen as a remedy to declining visitor numbers in the country's shopping centres.

Changing Room uses the latest gesture technology to provide shoppers with an interesting, interactive experience and fitting in with the current day retailer's multi-channel strategy... selling via stores, websites, mobile and various other tools at their disposal.

Changing Room simulates the fitting room by superimposing various garments and clothing items onto individuals for their discretion. Seen as a tool to create interest and save time, Changing Room / Fitting Room also helps the shopper to decide on complementary items, increases security and reduces theft.

PRODUCT SPECIFICATION

- 47" commercial panel
- HD media content player
- Interactive touch / gesture
- Business management / log-in system
- Customer info. data-base / gain statistical data
- Stand alone unit
- Internal cooling system

- Dimensions : mm
515 (w) x 410 (h) x 1.6 (d)
- Weight: 38kg
- Great reliability / 24 hour : 7 day usage.

Touch Foil

Take advantage of the expanding market for through window / glass touch screen applications with our touch foil.

Our through glass touch screen foil technology is the perfect solution to make our projection screens interactive touch screens, creating a through window touch experience. The touch foil has no external components so the installation is completely safe and vandal proof.

The lightweight touch foil can be applied directly to a window, a glass or acrylic sheet with a rear projection screen or LCD screen positioned behind creating through-window / glass touch interaction.

PRODUCT SPECIFICATION

- Aspect ratios: 4:3 / 16:9
- Website Integration compatibility
- Add Vinyl Wrap / Graphic Screens

Projection

Rigid Screens

Rigid Screens

We have been making rigid rear projection screens for over 10 years and were one of the first companies to market affordable rear projection solutions and have adapted the original manufacturing techniques to enhance the image quality to match the demands of new high definition imagery.

RIGID SCREEN RANGE / SPECIFICATION

Eclipse II

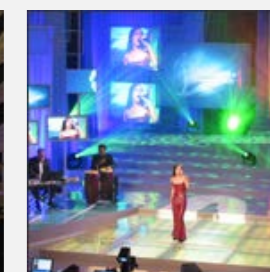

Contrast ratio: 200:1 / Gain: 5.0

Clarity Holographic

3mm - / Contrast ratio: 100:1 / Gain: 3.65

Mirror Screen

3mm / 2400 x 1200 mm sheet size

Projection Mirror Screens

Mirror Projection Screens

Our rigid, two-way acrylic mirror projection screen allows for viewing from both sides with no hot spot. When in use as a projection screen, the mirror delivers an outstanding image quality and reverts back to a standard mirror when not in use.

PRODUCT SPECIFICATION

- Available in aspect ratios: 4:3 / 16:9
- Website integration compatibility
- 2400 x 1200 mm sheet size / 3 mm thickness
- Self-supporting / frame mounted / suspended
